

Corporate Profile 2026

1. Angelini Industries

Angelini Industries is a **multinational industrial group** founded in Italy in 1919 by Francesco Angelini. Today Angelini Industries represents a solid and multibusiness industrial reality operating in 21 countries with 5,600 employees and revenues for 1.6 billion euros, generated in the **Health, Consumer Goods, Industrial Technology** business sectors.

Led by the Angelini family for over 100 years, the industrial group is characterized by an investment strategy focused on growth, a governance model that combines the long-term vision of family businesses with the practices of listed companies, an in-depth knowledge of the markets and of business sectors, and a commitment to promoting sustainable growth for people, communities, ecosystems and the planet.

2. Health

Angelini Industries has been taking care of people's health for more than 100 years through **Angelini Pharma** in the pharmaceutical sector and **Angelini Ventures** in the corporate venture capital applied to biotechnology, life sciences and digital health.

Pharmaceuticals

Angelini Industries operates in the pharmaceutical sector with **Angelini Pharma**, an international group that researches, develops and markets health solutions with a prevalent focus on the areas of Brain Health - i.e. Mental Health and Epilepsy, Specialty and Primary Care, and Consumer Healthcare.

Angelini Pharma is an integrated company, with extensive and recognized Research and Development programs, "World Class" production facilities and international marketing of active ingredients and leading pharmaceuticals in many market sectors.

The company operates in 20 countries with over 2,800 people and its products are marketed in over 70 countries, also through strategic alliances with some of the most important international pharmaceutical groups.

Research has identified over the years active ingredients of great importance such as trazodone and benzydamine; currently the research, development and innovation programs are concentrated in the areas of Brain Health (with a particular attention to mental health and epilepsy) and Consumer Health. The company includes public-private collaborations with Universities and Centers of excellence at national and international level, recognizing in scientific collaborations an important contribution in creating innovation.

The production plants of Angelini Pharma are at the forefront of technologies and industry standards as well as environmental protection, thanks to the use and integration of renewable sources. The sites include Ancona for finished products and Aprilia for raw materials. In Barcelona (Spain), the company produces food supplements such as Pastillas Juanola®, while in 2020 it acquired the Albany (Georgia, USA) plant, a global supplier of ThermaCare® Heatwrap. All the plants use the most advanced technologies, with automated control and supervision systems. Analysis and quality control, starting from the raw materials, are of particular importance throughout the process.

Angelini Pharma is directly present in Italy, Spain, Portugal, Austria, Poland, Czech Republic, Slovakia, Hungary, Germany, Romania, Bulgaria, Greece, Turkey, France, UK, Sweden, Holland, Switzerland, Russia and the USA. Strategic alliances with leading global pharmaceutical groups now allow the distribution of Angelini Pharma drugs all over 70 countries.

3. Industrial Technology

Angelini Technologies

Angelini Technologies is the Angelini Industries company dedicated to industrial technology and, together with Fameccanica, founded in 1975, designs and develops technologies and services aimed at the industrial-scale production of household and personal care goods, innovative logistics applications, batteries, and digital services focused on process optimization.

Converting and Automation & Robotics are the two main areas in which Angelini Technologies operates. The company boasts over 1,300 machines delivered worldwide, more than 1,200 active patent families, and over 700 employees across its operational sites in Italy, China, and North America.

2025 marks the 50° anniversary of the founding of Fameccanica by the Angelini family.

4. Consumer Goods

Angelini Industries takes care of people and families at every stage of life, with a wide range of consumer products.

The Fater Joint Venture

Fater, a company founded in 1958 by the Angelini family, **has been a 50-50 joint venture between Angelini Industries and Procter & Gamble since 1992**. It is a leader in the Italian market of absorbent products for the person, with the brands Lines, Lines Specialist and Pampers, and a key player in the European market of household products with the ACE brand, which it markets in 25 countries worldwide. In Italy, 3 out of 4 families have at least one Fater product.

Innovation has been the company's development guideline since its foundation: first in Italy, in the early 1960s, to develop the market for baby diapers and feminine hygiene products, Fater has enriched itself over the decades with new categories, such as absorbent products for incontinence (1979), ultra-thin sanitary towels (1992), until redesigning, after the acquisition of ACE in 2013, the entire range, for all household and fabric cleaning needs. Each brand of the company has developed its own social purpose that impacts, with specific projects, on issues related to the different categories in which it operates. Fater invests approximately 3% of its annual turnover in innovation. Its headquarter is in Spoltore (PE) and its production plants are located in Italy, in Portugal and in Türkiye.

Angelini Wines & Estates

In the wine sector, **Angelini Wines & Estates** works by combining tradition and innovation. It consists of 6 wineries, for a total of 1,500 hectares of land, of which 430 are vineyards.

In the three historic Tuscan wineries it produces fine wines in three different designations of origin: Brunello di Montalcino in Val di Suga, Vino Nobile di Montepulciano in Tenuta Trerose and Chianti Classico in San Leonino.

In the Marche region, the Fazi Battaglia winery, a historic brand of Italian wine, is renowned for the production of the Verdicchio dei Castelli di Jesi Classico. Cantina Puiatti in Romans d'Isonzo (GO) is dedicated to the production of the great white wines of Friuli, while Bertani is known for the production of its Amarone della Valpolicella Classico and Valpantena.

Angelini Wines & Estates is an agricultural company, thus tying wine production to its own vineyards. A choice which explains the group's commitment to investing and enhancing its viticultural heritage.

Angelini Wines & Estates is a company that has always been dedicated to sustainable production: this vocation led it to obtain organic and Equalitas certification for Tenuta Trerose in Montepulciano.
